THE TWO BEGGARS.

A begger stood at the rich man's door—
"I'm houseless and friendiess, and faint and poor," Said the buggar boy, as the tear drop rolled Down his thin cheek, blanched with want and cold.

"Ohl give me a crust from your board to-day,
To beig the beggar boy on his way.

"Not a crust, not a crust," the rich man said,
"He off, and work for your daily bread

The rich man went to the parish church, Ris face graw grave as he trod the porch, And the thronging poor, and untarght mass, Drew healt to let the rich man past. The services began, the choral hymn Arose and swelled through the long states dim: These the rich man knett, and the words he said Were, "Give us this day our daily bread."

Some time ago-never mind where-two sprightly and beautiful young ladies were visiting their cousin, another aprightly and beautiful young lady, who, like her guests, was of that happy age that turns everything into fun. All three were fond of practical jokes, and were constantly playing all sorts of pranks with each other. All three occupied a room on the ground floor.

Two of the young ladies attended party on a certain fatal night, and did not get home until half past eleven o'clock. As it was late they concluded not to disturb the household, so they quietly stepped into their room through the low, open window.

But it seems that about half an hour after they had left for the par-ty, a young Methodist minister called at the house where they were staying, and craved a night's lodging, which of course was granted As ministers always have the best of everything, the old lady put him to sleep in the best room, and the young lady (Fannie) who had not gone to the party, was intrusted with the duty of sitting up for the absent ones, and of informing them of the change of rooms. She took up her post in the parlor. But also sleep overcame her, and she departed on an excursion to the land of

We will now return to the young ladies who had gone to their room through the window. By the dim light of the moonbeams, as they struggled through the curtains, the young ladies were enabled to descry the outlines of Fannie (as they supposed) esconced in the middle of the They saw more—a pair of

masculine boots. The truth flashed upon them at once. They saw it all. Fannie had set the boots in the room to give them a good scare. They put their heads together,

and determined to turn the tables on her. Silently they disrobed, and stealthily as cats they took up their positions on each side of the bed At a given signal they both jumped into hed, one on each side of the unconscious parson, laugh ng and screaming, "Oh, what a man! Oh, what a man!" They gave the poor b wildered minister such a promiscuous bugging and tussling as few persons are able to brag of.

Is Again Slowly Improving.

The Great Heat and Drouth in Southern Illinois.

WASHINGTON, Aug. 10, 8:30 a. ac.-The president slept soundly during the night, and this morning his temperature is again normal, although his pulse is still frequent. At present his pulse is 104, temperature 98.5, respiration 19.

y enough, not a single friendly person has called on Guiteau during his five weeks' incarceration. He never made m friend in the city, and he has recieved no proffer of commel or aid. Such absolute destitution of friends is upprecedented, even among the lowest criminals. He has never sent for anybody. He intended and arranged to be driven direct to jail after the shooting, and feels comfortable with the soldiers guarding him. It is apparent he never expected to suffer for the crime, believing he did a duty and was making room for a more just man. He believed the

fortable and quiet day than would have been thought compatible with his state of continuous fever. He has taken more nourishment than yesterday, but still in a liquid form, and has experienced no recurrence of the distressing nausea which aggravated his febrile symptoms yesterday afternoon. The new incision is still very sensitive to the touch, and even the laying of a piece of lint saturated with carbolized oil on the raw flesh on the mouth of the cut causes pain. It is to this sensitive and painful condition of the wound the continuous fever is attributed. The sides of the incision, however, will grow less sensitive as they become covered with the natural secretions which follow an injury of this kind to the tissues, and by to-morrow or next day the new wound will be little more sensitive than the old one. It the meantime the drainage tubes are dispensed with, and the mouth of the incision is simply kept open with a little lint and absorbent cotton, which are removed as they become saturated with the discharge. The quantity of pus obtained to-day was not great, but it was apparently all the wound contained. The strack was thoroughly cleared, and what irritation there now is from the wound must be attributed to the fresh incision, and not to the retention of anything which

The old wound made by the bullet has entirely healed, and its mouth is partially covered with a newly formed skin. The intensity of the fever to-day was about the same as yesterday. The patient's pulse rose from 104 at noon to 106 at 6 p. m., and temperature from 97.7 to 101.9. Shortly after the evening examination, the fever began abating, and at this hour his pulse is 100, and his temperature has decreased, as he has slept most of the evening, and it is not possible to hold a thermometer under his arm ten minutes without seriously disturbing him, the exact temperature is not known, but thought to be below 100. It is now five days since the last hypodermic injection of morphia was given, but the president seems to have no difficulty in getting a good night's rest without it. He is sleeping soundly now. Drs. Bliss and Reyburn both report him doing well, and that a decided change for the better will be to from New York and 30 cents gled for alike by rich and poor, bond he the new junious apparent as soon as the irritation caused by the new incision entirely subsides.

ought to come out.

WASHINGTON, August 9 .- The doc tors still maintain the opinion that the president's fever will begin to recede to-night and that he will be better. This morning the president, to show that he could do it, wrote his name. He wrote "James A. Garfield, August 9, 1881," in his natural hand on a tab-

Notwithstanding the surgical operation performed upon the president yesterday his condition to day was not unfavorable. Throughout the night the patient slept naturally without anodynes. This morning his temperature and respiration were higher than during any day since the relapse of two weeks ago. This, however, the doctors attribute to the etherization of yesterday. Dr. Agnew told Secretary Blaine last night that during to-morrow he looked for high pulse and temperature. After to-morrow he expected a marked improvement in the president's condition. That he has faith in his improvement Is HEGEMAN'S CAMPRON ICS. It should be is evinced by the fact that he left this rubbed upon the part effected. The warmth afternoon at two o'clock for Philadelis evinced by the fact that he left this

Throughout the city to-day there was considerable apprehension, a feel-Dr. Reyburn said nothing was concealed. The bulletins expressed the whole case without rose colors. The president had peaceful sleep this afternoon. He believes there will be no further need of the knife. The higher pulse and temperature to.day was due entirely to the operation, and the president may not raily till Thursday, but all agree that he will rally.

At 10 to night Bliss said the president was sleeping and the surgeons were satisfied. The parts about the new incision are very sore, causing irritation and fever, as it would in a well man. He has fallen off a good deal, but probably has fallen off all he will. No morphine was given to night.

NEW YORK, August 9 .- The Evening Post's Lynchburg (Va.) special says The Republican state convention, which is to assemble here to-morrow, is attracting very general attention. All of the Republican leaders in the state are on the ground. This morning the hotels and principal streets present a rather lively appearance. The chairman of the state committee, Mr. Cockrane, has rented Holcomb hall, in which the convention will meet. Anticipating a split, the Mahone Re

publicans have secured Redman hall. It is thought that if the straight-outs make things too warm for them, the coalitionists will retire to the hall secured for them. It seems quite certain WASHINGTON, August 9.—Singularthat those in favor of uniting with Senator Mahone have the greatest number of more influential Republicans. The greater part of the government officeholders on the ground are in sympathy with that side in this fight. All of the indications point strongly to a split in the convention. It matters not which side may secure control of that body, there is every reason to believe that Wickham's friends will put a ticket in LATER-The Republican convention

The city is excited. There will surely be a division. Two open-air meetings were held to-night. VANDALIA, ILL., August 9.—To-day

has been the hottest experienced here this season, the thermometer registering from two to three degrees higher than at any time during the late hot spell in July. About 10 o'clock this morning a scorebing northwest wind, that seemed to some direct from a furnace, struck this place and has continned throughout the remainder of the day. The effect was quite noticeable and everything seemed to suffer much with it. Such a hot blast was never before felt in this section. No rain has fallen here for over a month and everything is suffering much from the excessive heat and continued drought, and the general cry is for rain.

MATTOON, ILL., August 9 .- To-day has been the most oppressive of the season in this city, the mercury rising to 103 degrees, and the air resembling a genuine Kansas simoon, blowing in hot waves like the draft from a furnace. The weather is still very dry, with little prospect of rain.

SANDOVAL, ILL., August 9.—To-day has been the bottest of the heated term. 105 degrees in the shade at noon. The corn crop is a failure. Farmers are cutting it to feed stock. The ground is so dry that farmers can't plow for wheat. The wells are dry, and it is almost impossible to get water for stock. If the drought continues untold damages will result.

BUNKER HILL, ILL., August 9.-Corn is suffering for rain, and in some places it is burnt up and will not mature. There is at present almost a water famine. A fine local shower fell on Thursday last, but failed to extend much beyond the city. Thermometers to day many to the failed to extend the city ask you to try it. Prices, 10cts. 50cts. and \$1. Dixon, Ill., Aug. 9 .-- A very sad leath occurred here last sight, and one which has enlisted the sympathy of the entire community. About six weeks ago John A. Hallett, a former wellago John A. Hallett, a former well-known business man of this city, lost a daughter, aged 13 years, which sad event was followed three weeks later by the death of his wife, who died from nervous prostration. Since the terrible affliction which visited the home of Mr. Hallett he has been bowed down with grief which the efforts of his relatives and friends could not subdue. He lost his appetite and would not leave his room. On Friday night of last week he went to bed, remaining until his death, which occurred as above stated about 10 o'clock last night. The deceased leaves quite a valuable estate and numerous relatives residing in Missouri and Kansas. His death was caused by grief which no human remedy

could comfort. PROVIDENCE, R. I., August 9.—The dwelling of Dr. William Bowen, in Scituate, was burned last night with nearly all its contents. After the house burned fire broke out in the doctor's barn near by. Help being at hand, the flames were extinguished, when it was found that the fire was caused by an infernal machine operated by clockwork. Doubtless the same kind of apparatus was used to destroy the house. Dr. Bowen has been very active in enforcing the law against liquor selling, and has before suffered in consequence. There is great excitement in the town.

DENVER, Aug. 9.—A Central City special says: "The most destructive flood in the history of the country occurred this afternoon. At 2:30 a heavy storm cloud appeared, accompanied by lmost incessant thunder and lightning. About 4 o'clock the citizens were startled by an almost unearthly roar to the west, and instantly a volume of water between four and five feet high came rushing down Nevada and Eureka-sta., taking everything by surprise. A beavy quartz team standing on the street was verturned and carried down the stream like feathers. Rocks weighing five or six hundred pounds were rolled along the streets like pebbles. Animals and everything in the track of the flood were swept away. In an incredibly short fime the streets were cleared of people, everybody seeking shelter. During the flood large masses of debris were carried through the streets at the rate of fifteen miles an hour. The whole length of the guiches from Nevadaville on the one side, and the head of the Eureka on the other, present to night the most desolate scene. The roadways are entirely destroyed, in many places the ruts being five or six feet deep and extending for hundreds of yards. The entire tength for about three miles is strewn with debris of every kind. At several points between Central and Black Hawk the debris is piled twenty-five feet high. Eureka street, for a distance of a quarter of a mile, is one mass of rocks and rubbish. On Warn street five feet of sand is deposited. The flood was caused by the bursting of a rain cloud, and the entire west of the city, the [natural channel of the stream, became dammed, turning the water into the street. The only loss of life known at present is that o Joe_Berry, whose body was found in the Black Hawk. The flood lasted but twenty minutes. The damage is esti-mated at \$50.000, sustained by the highway. A number of small houses upon it were washed away, and many residences and stores flooded, and mud and sand deposits on the floors and the cellars to the depth of several feet.

Advices from Idaho Springs say it was the severest ever felt. Seven houses in Virginia Canon were carried away. A six-year old girl was drowned, and nearly all the railroad and county bridges between the forks of the creek and Idaho were swept away. Nearly all the houses in the business portion of town were flooded and the streets damaged The damage to Idaho will amount to \$20,000. It is estimated it will take a hundred men forty-eight hours to repair the damage to the railroad tracks between Idaho and Floyd Hill. No trains are expected to arrive or depart in Central until late to-morrow.

PHILADELPHIA, August 9 -- W. C. Buditt, a lawyer, supposed to represent the Pennsylvania railroad, has bought for \$97,000 the main exposition building, which cost \$160,000 and required 73 million feet of lumber and eight and a half million pounds of iron. The mortgage is to be paid out of the purchase money.

They have a death craving prisoner is the county jal! at Taylorville who bids fair to out fast Dr. Tanner. Robert E. Gray, a horse thief, is the name of the party. He announces that he proposes to starve himself to death unless be is released from prison. He began the starv ing process 16 days ago, and abstained from food for 15 days. In the early part of last week he wrote to his brother, who arrived there Sunday, and on that day Gray was prevailed upon to take a few spoonfuls of soup. That being over, he has gone into the starving busines again, declaring he will never eat another meal in jall. Gray's brother has returned to the east for the purpose of making some sort of arrangement for releasing him on bail. Gray is not the thinf's real name. When captured he refused, and still refuses, to give his name. The Sheriff called him Robert E. Gray, and he has gone by that name ever since.

Socially the term "gentleman" has become almost vulgar. It is certainly less employed by gentlemen than by inferior persons. The one speaks of "a man I know," the other of "a gentleman is the service of the service o man I know," the other of "a gentleman I know." In one case the gratieman is taken for granted, in the other it seems to need specification. Again as regards the term "lady." It is quite in accordance with the usages of society to speak of your separategans. The Draham as a of your sequentance the Duchess as a "very nice person."
